

John Crane Bearing Technology has almost 60 years of experience in the design and manufacture of engineered bearings for high performance rotating equipment.

John Crane bearing technology center of excellence is based in Gottingen, Germany and has the facilities and expertise to supply engineered hydrodynamic journal and thrust bearings, for the most technically arduous duties.

JCBT currently supply to the largest turbo equipment manufacturers in the world and the list of customers includes the following;

Siemens Turbomachinery
Sulzer Pumps
MAN Turbo
Atlas Copco
Cryostar France

John Crane can offer tailored engineered solutions to your journal and thrust bearing requirements, utilising tilting pad or multilobe bearing designs, manufactured in our state of the art facilities.
